DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 102-104** are rejected under 35 U.S.C. 102(b) as being anticipated by Quakenbush (US 5104705).

Quakenbush discloses a glass capillary tube for drawing samples. The device comprises of a fluid-retaining aperture (see Fig. 4) through which a deposit device can transit to pick up a drop of fluid to be deposited. The internal surfaces defining aperture having a surface roughness that increases its wettability. Quakenbush recites, " Pin 40 has a textured surface formed by exposure to super-fine sand or talc under pressure to "blast" the surface of the pin." (See Col. 3, Lines 31-35) The surface roughness is at least 100 microinch. (See Col.2, Lines 57-58)
